

SIMED CONSTRUCTION

We design, manufacture and export various types of steel constructions according to individual, institutional and governmental projects and orders. We create a wide variety of steel constructions, both raw and processed, in different sizes and configurations. Our offer is suited for the clients who want to be served at the highest level.

We have been present in over 60 countries on 6 continents for over 10 years.

ABOUT US

We aim not only to provide the projects and high-quality steel constructions of sandblasted, varnished and/or galvanized surface, but also to maintain an individual and professional relation with each client. Regardless of the scope of requirements, we make every effort to meet them at the highest level.

We are experts on the field of designing, manufacturing and exporting steel constructions to various foreign markets. Thus we are helping our clients to make conscious decisions regarding their investments and purchase. We offer our services from design to ready constructions for the following: power industry, metallurgy, petrochemicals, exhaust gas cleaning plants, incinerating plants, mining industry, telecommunication industry and road building.

We offer steel constructions in a wide assortment, used for the construction of shopping centers, off shore constructions, bridge structures (footbridges, overpasses), lifting constructions, storage bins, chutes, installation constructions with devices, steel pallets and containers.

OUR PROJECTS

PACKING, LOADING, SHIPPING

Within the frames of our comprehensive service, our products are packed appropriately, secured for the transportation and delivered undamaged either to the client or to the assembly site. We continuously improve our packing and loading techniques for the unloading to be easier and with no damage to the goods.

We provide safe shipping and guarantee that the ordered products will reach the client. Our shipments are always affordable and on time.

QUALITY

Our actions aim to continuous improvement of our services and offered goods, as well as matching them to the technical specifications in order to get the greatest satisfaction of our customers.

We have the quality certification within AS/NZS 2208:1996, SGS and ISO9002 range.

Steel Structure Equipment
Light Steel Structure Equipment
Galvanized Steel Grating (SSE-001)

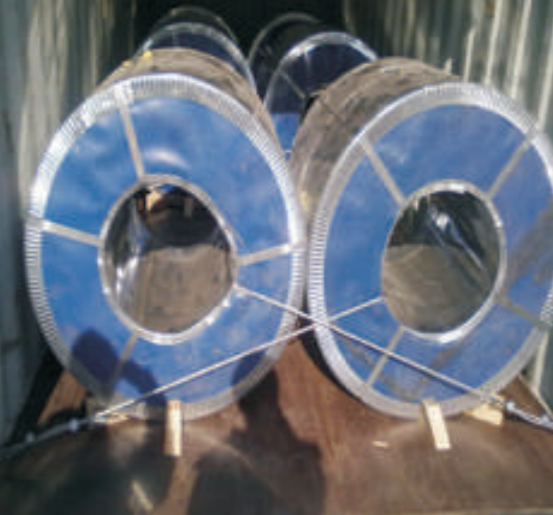

CONVEYORS

- GA gravity roller conveyor module
- GB gravity roller conveyor
- GS sprocket drive roller conveyor
- GO Line shaft roller conveyor
- GQ Poly-vee roller conveyor
- GJ Accumulating roller conveyor
- WG curved roller conveyor
- Belt conveyor
- Curved belt conveyor
- Telescopic belt conveyor
- Mesh conveyor
- Chain conveyor

We produce roller, conveyor, ball transfer unit, skate wheel and many other components. Both OEM or design can be satisfied. Our production capacity is 30,000 pieces of roller and 100 sets of conveyor per month. We have got ISO9001 quality certificate in 2010.
